

SHORT COURSE

CHILD-RESPONSIVE TRANSPORT DESIGN

With a focus on road safety, street design for kids and safe school environments

25 March 2024

Venue: ChildSafe, Red Cross War Memorial Children's Hospital

This course aims to:

- Inspire urban and transport professionals, government officials, academia and civil society;
- Inform stakeholders how children's vulnerabilities are related to their built environment;
- Sensitise stakeholders to the benefits of developing child-responsive urban settings (people-centred design of streets and school environments, as well as children's participation);
- Provide a practical planning toolbox with child-responsive urban planning instruments to make a situation analysis and formulate area-based solutions;
- Co-produce action plans and generate behavioural change with children and communities, to measure, monitor and evaluate progress for children.

Presenters:

- Ms N. Prusent: Adolescent Development Specialist, UNICEF SA
- Prof M. Vanderschuren: Transport Planner/Engineer, UCT
- Prof A.B. Van As: Honorary Professor of Surgery, University of Limpopo & Emeritus Professor of Surgery, UCT
- Mr P. Muchaka: Project Manager, ChildSafe South Africa
- Ms C. Fransolet: Universal Access Consultant, Inclusive Design

This is a Continuous Professional Development course:

- The course fees are R1 800. For academics, students and government officials, special rates can be negotiated.

We want to inspire you with evidence and promising practices in different urban contexts
