

As many learners use scholar transport, ChildSafe South Africa calls on parents to ensure their child's daily transport is safe.

## Check the driver

- Has a valid Professional Driving Permit (PDP)
- Check the license card and ensure it matches the driver
- Ask about backup drivers and verify their credentials.

**No transporting children  
in the back of an open  
truck or bakkie**

## Prevent Overloading

- Each child must have their own seat
- Seatbelts/restraints are NON-NEGOTIABLE
- Ask the driver/operator about Passenger Liability Insurance

## Keep Communication Open

- Save the driver's and owner's contact information
- Expect reliable updates about delays or route changes
